

i.life solutions award winning technology for the ultimate lifestyle...

i.life solutions, award winners in January, 2006, for innovation and technical excellence, collected the honour in front of an audience of 10,000 people, at one of the largest technology award ceremonies in Europe; the ISE Awards in Brussels.

i.life are an exclusive lifestyle technology company, based in St Albans, boasting not only the most advanced demonstration facility in the UK, but a client list of Sports, Celebrity and Executive Professionals that reads like a 'Who's Who' of popular culture and blue-chip companies.

i.life solutions is a development of CCOMM, a brand which has been at the cutting edge of integrated technology for a range of blue chip corporate clients for the last 10 years. CCOMM have provided boardroom solutions for executives of major firms, which include Ford Motor Company, BP, KPMG, Standard Chartered Bank, Cable & Wireless amongst others. ilife solutions has evolved out of requests from company directors who began to ask if the same sophisticated technology could be applied to their homes.

The award was for a challenging 'Penthouse Apartment' refurbishment project, located in the old MI6 building, Westminster Bridge Road, London. This was achieved through a combination of intricate design and the use of state of the art technology solutions – *see images on CD attached.*

Common to each room is a simple intuitive control device providing an interface to the Door Entry System; Telephone; Lighting; Environmental Control; Home Cinema; Black out Blinds; Music and Video and PC systems. The solution has been engineered for remote access, where the control devices can be set to operate via text message, e-mail or over the internet!

4 centrally located Media Centre PC's serve each room; 48 lighting circuits; 28 black out blinds; in wall video screens; motorised TV screens hidden in the ends of the beds that rise up when in use; external CCTV camera with pan, tilt and zoom functionality; amazing views of the London Skyline and the ability to project Big Ben's clock face on the inside wall to know exactly the time.

Ends.
